Accessories Snoots | Louvres | Lenses
Weight AL | BK | WH - 220g -230g

Evo S11 is a fully adjustable spotlight for the MR11 lamp, mounted on a long arm. It is specifically designed for use with wall mounted ReTrac and Monopoint systems. There are three interchangeable snoots that click into place with a bayonet mechanism, each of them compatible with a wide range of lenses and louvres, using an optional snap-in accessory holder. The specially designed heatsink and airflow system reduces the lamp and surface temperature while preventing any light spill. Standard finishes are brushed aluminium, rubbed bronze, white and black, with custom finishes and arm lengths available on request.

The jack plug system allows the luminaires to be easily removed for cleaning or relamping. The luminaires click into the jack plug socket, the threaded jacket then screws into position to lock the connection in place. Once fixed, the luminaires are free to rotate or alternatively, can be secured in place using two locking pins.

Notes

For Evo S11 snoots and accessory holders please see spec sheets 240-01 & 244.
 For Evo S11 accessories please see spec sheet 900.
