**Lockable** Pan & Tilt  
**Accessories** Louvres | Lenses  
**Weight** AL | BK | WH - 400g

The Evo Projector is an accessory designed to fit the base of an Evo 16, converting the luminaire into a framing projector. The aperture is adjusted using removable framing arms, and the beam can be controlled using a focusing wheel. The design also includes a gobo rotator. The projector can accept an optional double accessory holder, and is available in brushed aluminium, black and white, with other finishes available on request.

The jack plug system allows the luminaires to be easily removed for cleaning or relamping. The luminaires click into the jack plug socket, the threaded jacket then screws into position to lock the connection in place. Once fixed, the luminaires are free to rotate or alternatively, can be secured in place using two locking pins.
