- Minimum Ceiling Void Depth** NA [surface mounted]
- Maximum Material Thickness** No Limit
- Distance Between Screws** 50mm
- Accessories** Plug
- Weight** AL | BK | WH - 90g | RB - 210g

The Surface Monopoint is designed for use on beams, walls and ceilings, where the jack plug system cannot be recessed into the mounting surface. It is powered by a remote transformer, and is available in brushed aluminium, rubbed bronze, black and white, with custom finishes available on request. Ideal for use with a BESA box.

The jack plug system allows the luminaires to be easily removed for cleaning or relamping. The luminaires click into the jack plug socket, the threaded jacket then screws into position to lock the connection in place. Once fixed, the luminaires are free to rotate or alternatively, can be secured in place using two locking pins.
